Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, 22-25, drawn to a process.

Group II, claim(s) 18-21, drawn to apparatus.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common feature is represented by the requirements of the apparatus, which is not patentable (special) as demonstrated by the references cited in the PCT proceedings. There is no patentable feature linking the groups. There is a burden to search both of them, and the apparatus has separate utility to recover heavy metals from ore or spent catalysts.

A telephone call was made to Mr. Repper on 6/22/10 to request an oral election to the above restriction requirement, but did not result in an election being made.
